

## **POST THERMAL CAUTERY CARE**

---

After a treatment with the Thermal Cautery Unit, the areas cosmetically treated may feel irritated and appear red, as well as scabbing may form.

- DO NOT pick, rub, or scratch scabs as this may lead to hyper pigmentation or scarring.
- Keep area moist. If you do use Neosporin, only apply for a few days.
- Use SPF 45 or higher daily.
- Avoid direct sunlight or tanning for 21 days post treatment.
- Do not use any harsh or irritating products until the treated area has healed completely.
- Pat area dry after shower. DO NOT RUB.
- No Make-up on the treated area, for 24 hours post treatment.
- DO NOT have any skincare treatments, waxing, or bleaching for at least 21 days post treatment.
